- Designing new components for WordPress and React-based applications, such as the shopping cart and dashboard.
- Retrieving data via GraphQL queries by constructing efficient queries for real-time updates.
- Creating Dynamic Components with Wordpress ACF and Magento Content Block
- Styling pages using Tailwind CSS and SCSS to create responsive, appealing interfaces.
- Managing data with React Hooks
- Sending data via dispatch functions using Redux or similar libraries to update state.
- Implementing responsive design to ensure the application functions well on various devices and screen sizes.
- Optimizing web pages for maximum speed and scalability.
- Writing and maintaining clean, efficient, and reusable code.
- Identifying and fixing bugs through troubleshooting, debugging, and implementing solutions.
- Assisting in launching A/B testing by scripting necessary code.
- Participating in team meetings and contributing to project planning and decision-making.
- Creating and maintaining documentation for front-end code and processes.
